

Scootertyp: TRAVELSCOOT - Issue: maximal speed

I was informed that the maximal speed limit of over 6 km/h might not cope with the regular laws and thus it might be forbidden to use the scooter on public areas at all. I am aware that the higher speedlimit leads to a higher accident risk. I am very familiar with the scooter and will not get in trouble due to the higher speed and I will not hurt passangers with the scooter and use it only on privat ground if the laws require that.

Nevertheless I want to use my scooter with the following maximal speed:

Adjustable speedlimits: (please sign)

() up to 7,5 km/h maximal motorspeed.

() up to 9 km/h maximal motorspeed

I understand the issue of this and confirm

Place, date and signature
